## **Revolutionize Your Medical-Legal Case** **by Hiring a CLNC®**

What is a CLNC®? This is a Certified Legal Nurse Consultant<sup>CM</sup>, “An Attorney’s Super - Secret Weapon!” This is an RN (Registered Nurse) with at least one year of hospital/clinic experience, however, many of us have 30+ years of wide ranging nursing experiences, with very specialized skills and training in Legal Nurse Consulting from the Vickie Milazzo Institute. We are proud members of NACLNC® which is the National Alliance of Certified Legal Nurse Consultants<sup>CM</sup>. There are eight CLNC®s in Alaska and two of us in Fairbanks.

Certified Legal Nurse Consulting<sup>CM</sup> is a very different kind of nursing, which can greatly benefit you and your attorneys, when you have a medical-related legal case.

The reason that attorneys and insurance companies bring medical cases to court, is because accidents happen, medical mistakes unfortunately occur on occasion and people get injured or harmed. Other times people get injured due to the criminal or negligent acts of other people.

People get injured at home, at work, on the roads, by using faulty products or by consuming prescription medications, that, sometimes cause harmful side effects, or by exposure to toxins in the environment, etc.

On occasion, people who legitimately should be receiving Social Security Disability benefits do not receive them, because they are wrongfully withheld. Similarly, this may occur, with Worker’s Compensation benefits.

On the “flip-side” there is an increasing number of people, who commit insurance fraud or are bringing bogus, medically-related cases to court. Other, dishonest people claim to need Worker’s Comp benefits, when they are not legitimately injured or have long-since healed. Perhaps you or your family has been wrongfully named as the Defendants in a Motor Vehicle Accident, or maybe someone claims to have been injured at your home.

The types of cases that a CLNC® typically is hired for, are as follows: 1) Personal Injury 2) Medical Malpractice 3) Wrongful Death 4) Product Liability 5) Social Security/Medical Disability 6) Worker’s Compensation 7) Toxic Tort or 8) any other medical-related cases in any medical specialty, Plaintiff or Defense.

We can be hired as a CE (Consulting Expert) or a TE (Testifying Expert). We can perform 30+ services, which can revolutionize any medical-legal case, which equates to successful outcomes.

An attorney should hire a CLNC® as soon as any medically-related case comes in. Our many years of wide-ranging nursing experience, together with our very specialized skills and training as a Certified Legal Nurse Consultant<sup>CM</sup> allows us to demystify the medical records, since RN’s know the documentation inside-out and we know what the flow should be, as well as policies and procedures. “Let us make Dollars and Sense out of the medical records.”
